

THE RICHMOND TERMINAL WAS ESTABLISHED IN 1903, AND IS THE LEGAL COUNTY AND CITY NEWSPAPER. RICHMOND'S NEWS SUMMARIZED.

The Terminal boosts and advertises Richmond, directly increasing your property values.

# RICHMOND TERMINAL

The Terminal is the oldest newspaper in Richmond and has the confidence and support of pioneers

VOL. XIV

RICHMOND, CALIFORNIA, FRIDAY, JULY 13, 1917

No. 28

## New Carbon Factory For North Richmond

### Will Employ 200 Men at Start, It Is Said

The American Carbon Company of which John Leibezy is president, has selected a site in North Richmond near the furniture factory and the right of way of the Belt Line railroad.

The factory will be built on the unit plan, three buildings being required for the entire plant which is to occupy three acres of ground space.

In an interview with a representative of the company, The Terminal was informed the buildings would be completed and equipment installed by Oct. 1, 1917, employing 200 men at the start, the full capacity of the plant being 1000 men.

It is said the company turned down an offer made by Los Angeles for a site and came to Richmond on account of the generous donation of land, not overlooking the wonderful water and rail advantages which favor this city as a seaport at the gateway of the American continent.

### Richmond's Eligible Registration 2775

Chairman Levi Boswell had a big force of clerks on Friday and Saturday, nearly all women, checking over the draft registrations of June 5. The number of eligibles for draft service numbered 2775. Contra Costa county's draft list contains 6206 names.

### Mortimer Veale Joins the Navy

Mortimer Veale, son of Sheriff R. R. Veale of Martinez, has enlisted in the navy and will join the submarine department of Uncle Sam's fighting force, having been notified to appear at naval headquarters in San Francisco where he will be assigned to duty. The Veale boys are "chips from the old block," the kind of material required for good soldiers.

### U.S. Artilleryman Guest of Sister

Bird Mason, coast artilleryman 3d Co., Fort Scott, who is in the service of the government as an electrician and who operates the big coast searchlight near the Cliff House, San Francisco, is in Richmond visiting his sister Helen Morgan, of Macdonald avenue. Bird is a fine young man and high up in artillery circles.

Moved to East Macdonald Ave.

The Half Sole Tire Agency has removed from 136 Macdonald Ave. to 1314 Macdonald ave. where they will continue renewing soles.

Johnson, bootblack, 6th and Mac.

### Vacant Lots to Bring Forth Fruit

Local Drove No. 130, P. P. O. S. has started a movement to cultivate vacant town lots in order to increase the food supply. All organizations, civic, fraternal, etc., are asked to co-operate. A number of vacant lots have been tendered by property owners. Spuds, cabbages, parsnips, etc., substituted for thistles and jimson, will help "save the waste and win the war." G. M. Crandall, H. E. Somerville and A. Rodas compose the committee, and will be glad to enroll you in a good cause.

It has already been announced that canned food will be sky high the coming winter. Lessen the demand by canning and drying your own products, thereby heading off the food exploiter, who is crying over-production.

### Richmond Fraternal Man Paid Honors

J. C. Korn, the well known fraternal man, active member of Richmond Drove No. 130, Patriotic and Protective Order of Stags, was notified by Supreme Recorder G. E. Holke of St. Louis, that he has been appointed member of the Supreme Advisory Board of the Supreme Drove of the order, which has its headquarters at St. Louis. Mr. Korn is receiving congratulations from his fraternal friends, who are highly pleased at the honor conferred upon a Richmond man and a charter member of No. 130.

### Incorporation Meeting Tonight at El Cerrito

A mass meeting will be held this evening at Fairmont school, El Cerrito for the purpose of discussing incorporation. Speakers will be there from several nearby cities to tell of the benefits of incorporation. It is stated that the people favor incorporation, now that they understand more fully the benefits to be derived.

### Capwells 25th Anniversary

Capwells 25th anniversary is being celebrated this week at the big store at Clay, 14th and 15th streets. The building is attractively decorated, and souvenirs are being distributed recalling pioneer days in merchandising and showing the wonderful progress of this popular concern. President Capwell and Vice-President Lavenson tendered their contemporaries a banquet at Hotel Oakland, and Capwells 500 employees also held a similar affair.

R. H. Curry, soda water manufacturer has filed suit in the Superior Court for \$50,000 damages against the Santa Fe railway.

### Dentists to Further Scientific Research

In order to carry on research work to further investigation of the scientific problems of dentistry, several members of the dental profession have presented to the University of California a fund of \$312, this amount to be applied in purchasing a grinding machine and other equipment for the dental department of the university.

### Imperial County Leads In Cantaloupe Production

It is astonishing to many what sunshine, silt and water will do. But in Imperial county they consider it common to ship out of that wonderful valley 5000 carloads of cantaloupes each season.

Imperial county, a few years ago a desert, is one of the biggest advertising cards of the state. Imperial will ship this year 2,608,200 crates of the little melons, which is twice the annual yield of Georgia, which state ranks second in cantaloupe production.

Imperial has 13,800 acres in cantaloupes this year, a little less than one-third of the entire acreage of the United States.

Colorado is third in rank, producing a fine flavored cantaloupe entirely, by the aid of irrigation.

The average number of crates to the acre in Imperial county is 190, the price paid the producer this year being \$1 per crate.

If you had 50 acres of cantaloupe land in Imperial, one year's crop would put you on "easy street."

The California High School association, in annual convention at Berkeley, closed their session today.

### LITTLE BOOSTERS

F. A. Mayfield, dealer in paints and oils, also a specialist in the glazing line, will move into his new quarters 316 11th street, Aug. 1. His new location will afford more room for his growing business, and will also be nearer Macdonald avenue.

Soldier boys are in evidence on nearly every street car, and at every turn one sees the familiar khaki uniform. And it is a compliment to the wearers that they are invariably not under the influence of alcohol. Uncle Sam's restrictions are for the best, and the boys graciously acquiesce.

The extension of the Sixth street car line into North Richmond is now being considered by the company, increasing population and steady growth of North Richmond demanding convenient transportation facilities.

### Summer Band Concerts.

The appropriation of the city of a reasonable sum for the band concerts is a commendable one. If such appropriation is granted, the concerts should be given in various locations of the city, so that all business sections would be benefited to the exclusion of any one favored locality.

### Short Haircuts Doomed—Girls "Wising Up" on Phenology

It is advertised that the "chink" haircut, which consists of peeling the base of the noodle to the equator above the ears, giving the anatomical zone at the occiput the appearance of a skinned onion, is to be tabooed. It is claimed that the display of dents, scars and irregular elevations have attracted widespread attention of the gentler sex, many of whom have taken up the study of phenology with the view of becoming competent to select a "live one" when matrimonially inclined.

Jas. T. Nabett has been appointed Captain in the U. S. officers reserve corps of Engineers.

### Salaries of Policemen Deserve Boosting

The Terminal has frequently mentioned the fact that Richmond policemen were underpaid; that \$90 per month is not enough pay for a patrolman who is exposed to all kinds of weather and whose life is constantly in danger. The city council should raise the salaries of policemen to \$100 per month now, which is small enough, considering the purchasing power of the present dollar.

### Prominent S. F. Bay Skipper Rides Broncho

(Special to The Richmond Terminal).

SALINAS, Cal., July 13.—Captain Harry Johnson, skipper of the San Francisco bay launch Active, accepted the invitation extended him by local cattlemen to participate in the sports on the rodeo field with the fast bunch of professional cowpunchers performing here.

Captain Johnson established his prowess as a pastmaster in riding and controlling bucking bronchos, notwithstanding the "squalls" and "sea legs." He made one of the hits of the Salinas rodeo.

### California Furnishes Largest Food Supply

The United States Bureau of Crop Estimates gives the following report for the prospective contribution of the Golden State for 1917:

Wheat, 5,610,000 bushels  
Oats, 6,470,000 bushels  
Barley, 35,100,000 bushels  
Hay, 4,470,000 tons.

Comparative figures indicate a big increase in all fruits and nuts.

Sonoma county broke all records this year in berry production, shipping June 22, 1917, 6 carloads of Loganberries being shipped East by express.

Contra Costa county will figure high in sugar beet culture, beans and alfalfa. Irrigation in the eastern part of the county is reclaiming much land for agriculture and fruit.

### Polar Pressure May Be Cause of War

Governor Stephens receives some unique messages in regard to the cause of the war. Here is one he received that sounds like it might have come from Richmond:

"The real cause of war is polar pressure, liberating negative electricity. Europe and Mexico are going mad like coyotes. If matters continue, every being with a head will drop dead with spasmodic contraction, or go mad with brain pressure. The remedy is to pull down the Eiffel and Marconi towers, suppress electric companies, bring rain to the deserts, making them a good conductor to disperse negative electricity and form vapor connection between the equator and the poles to relieve polar pressure."

### Bucked Snow in Sierra Nevada Mts.

F. E. Wixson and son Bruce, who recently arrived from Nevada, traveling with a team and wagon, relate some thrilling experiences in crossing the range, bucking the snowdrifts at one point three days, shoveling their way out, and finally receiving assistance from a rescuing party, and later arriving at Red Bluff.

Mr. Wixson sent his wife and two children ahead by train, who arrived here several weeks in advance of the wagon and its occupants.

### Bank Clearances.

The following are the bank clearances for June of the principal California cities:

San Francisco.....\$415,874,088  
Los Angeles.....126,470,000  
Oakland.....25,654,085  
Sacramento.....12,025,731  
San Diego.....11,647,600

No able-bodied man should permit his wife to work in the garden—unless it is "absolutely necessary."

### License Required If You Sell Real Estate

The California State Realty Federation has finally succeeded in getting the law passed that will practically eliminate the "curber," the irresponsible fellow who has not added dignity to his calling.

The federation has fought for this law for twelve years, it being vetoed by two former governors. The present governor signed the bill a few weeks ago, which makes it unlawful to make a sale or receive a commission unless as a broker he has first taken out a license with the state at a cost of \$10 per year, with two responsible persons to vouch for honesty.

But this is not all. He must put up a bond of \$1000, the bond being liable for judgments for damages.

The license is revokable by the commissioner, if cause is shown.

Licenses must be renewed each year, and fines and imprisonment are penalties for not complying with the new law.

### Old Glory Waves High on Mt. Diablo

The Native Sons of the Golden West are all good fellows and have a substantial organization of which it is an honor to be a member. The thrilling feat of placing the stars and stripes at the top of a high mast on the crest of Mt. Diablo the Fourth of July by James F. Hoey, C. H. Henderson, G. T. Barkley, F. R. Jones and J. R. Booth is worth reproducing in the motion pictures, which would be a good adv. for California in the east, to show them "how to do things" on a large scale.

### Good Stories About The Isle of Java

(Albany Argus)

C. W. Hennenberg of Stannage avenue will give the readers of the Argus some interesting descriptive stories of the Isle of Java, which is one of the East Indies. The wild animals and the manners and customs of the natives is interesting. Mr. Hennenberg spent a number of years there on a coffee plantation, miles from civilization, where the trails of big game were used for roads, the tiger being a common animal and beast of prey there.

## Harbor Meeting Set For Wednesday Aug. 8

### CITY BRIEFS

Richmond schools will open for the fall term August 6, 1917.

Phil Journal, Sr., of Walnut Creek, visited his son Phil Journal, Jr., Sunday.

James Pope has converted the Colonial hotel, Pt. Richmond, into a first-class grill.

Judge John Roth is enjoying a visit from his brother, W. E. Roth of Portland, Oregon.

Mrs. E. M. Tilden has returned from Skaggs Springs, where she spent a pleasant vacation.

Mr. and Mrs. Arthur Murphy, newlyweds, have returned from their eastern honeymoon.

Mrs. E. J. Downey of First St. left Monday night for Springfield, Missouri, to visit relatives.

North Richmond is having a building campaign, the landscape being dotted with new residences.

Mr. and Mrs. Jps. T. Nabett and little son Kigh spent their vacation in the Russian River country.

H. B. Hollenbaugh was installed consul commander of Log Cabin Camp, Modern Woodmen of the World, Friday night.

J. H. Morrow of Berkeley is preparing to build two new cottages in Eleventh street near Nevin, the estimated cost being \$4000.

The First National Bank of Richmond has been designated a U. S. depository, through the Federal Reserve Bank of San Francisco.

Mr. and Mrs. C. Kennedy and children returned Monday night from their vacation which they spent in the northwest and the Sound country.

The new firehouse on East Cutting, in the Pullman district, is an attractive station, and conveniently located to make runs for any call in the southern part of the city.

## Richmond Water Front to Be Discussed

United States Army Engineers of this district will be in Richmond, Wednesday, August 8 to hear the petition of the city for the changes in the harbor lines in Richmond waterfront.

Colonel Huer, engineer in charge will conduct the hearing.

The public is invited, and everybody interested should attend.

## California Land Show To Be Grand Affair

Every section of California will be represented at the 1917 Land Show, which promises to be the biggest ever held in the state. President Robt. C. Newell has appointed the working committees, and every county in the state will be represented and have ample space for apprising the tourist and home-seeker of the resources and opportunities of each particular community. The exhibits and lectures will be in the hands of experts and featured in a comprehensive way.

E. L. Thorp and family are at Camp Mecker.

All charges were withdrawn against Chief of Police Chas. H. Walker. It was predicted by those acquainted with the affidavits that the case would be dismissed.

## 'Conservation' On Summer Vacations

Vacations are now in order, but many will this year adopt the doctrine of Russell Sage, who contended that vacations were "bunk." The unsettled condition of human affairs at the present time has taken the enjoyment out of some kinds of recreation, and many feel that this is no time for relaxation.

BUICK

SAXON

**J.D. LAUPPE**  
Superior Oil Co.  
Gentlemen:  
We have found Zerolene to be a satisfactory lubricant for BUICK automobiles and trucks.  
Very truly yours,  
J.D. Lauppe

**De BROY MOTOR COMPANY**  
MOTOR CARS  
VAN HORN AVENUE AND THIRD STREET  
Gentlemen:  
From our own experience and the reported experience of Saxon owners in California, we know Zerolene to be a most satisfactory motor oil. We never hesitate recommending it whenever consulted by our owners on the matter of motor oil.  
Very truly yours,  
De Broy

**Endorsed by Leading Car Distributors**

—because the records of their service departments show that Zerolene, correctly refined from asphalt-base crude, gives perfect lubrication with least carbon deposit

Less wear and more power because Zerolene keeps its lubricating body at cylinder heat. Less carbon because, being made from asphalt-base crude, it burns clean and goes out on exhaust

Zerolene is the oil for your car—whatever the make—the oil for all types of automobile engines. For correct grade, get our lubrication chart covering your car

At dealers everywhere and Standard Service Stations.

## ZEROLENE

*The Standard Oil for Motor Cars*

STANDARD OIL COMPANY (CALIFORNIA)

## WHEN I HAND YOU

your glasses they are not ordinary glasses, but especially made to suit the demand of your eyes for a correction of the error of refraction. They give perfect sight and do away with eyestrain and headaches—for your GLASSES see

**Watering Plants Drop by Drop.**  
Lucien Daniel, a French biologist, has made some experiments with cabbages, chloery, lettuce, etc., which prove that they thrive far better by a system of continuous watering than by drenching the soil thoroughly every other day. The new method, which is simplicity itself, depends upon the law of capillary attraction. As presented to the Academy of Sciences in Paris it consists of placing near each plant a large mouthed jar containing water, in which is dipped one end of a strip of linen or cotton whose other end lies near the plant. Mr. Daniel determined the exact amount of water required by any given plant for its best development and proved that in general this interrupted supply of water, drop by drop, gave infinitely better results than the usual method of intermittent drenching and with a minimum expenditure of water.—Literary Digest.

**Embroidery Designs.**  
Here are suggestions for transferring the embroidery design before you to any material:  
Perhaps the easiest way is the "windowpane" method. This is successful when the material is thin, like linen, batiste, etc. Pin the sheet of paper and the material together and hold them up against the glass of a window. With a sharp pencil draw on the material the design, which can be easily seen through the glass. If one-half of the design is given upon the paper and turn the other side to the fabric.  
If you have carbon paper you should place the sheet between the fabric and the newspaper. The latter is on top. With a sharp pencil go over the outline of the design. The impression will be left in fine lines and will last until worked.—Exchange.

**Cuts of Meat and Caloric Value.**  
The kind of cut of meat used does not usually make much difference in the full or caloric value.  
There is a popular belief that porterhouse steak and other choice cuts of beef represent the highest forms of nourishment to be obtained. This is, however, a misconception. The full value of broiled or roasted beef, as well as mutton and lamb, exceeds the much desired tenderloin steak.  
According to Langworthy, expert in charge of nutrition investigation of the United States department of agriculture, "for all practical, everyday purposes it may be considered that the protein obtained from a given weight of meat differs very little either with the kind of meat or the cut."

**A Life Preserver of Sheet Metal.**  
Metal swimming plates have made their appearance in the field of life preservers. They consist of metal plates put together just like two tin pie plates soldered with their faces joining, allowing the space between them as a dead air chamber, says the Popular Science Monthly. The advantage of these plates lies in the fact that they will not rot or crumble like a cork life preserver. A properly applied paint prevents rusting, and they are always ready for use. They do not have to be inflated like the water wings which are used by some swimmers. There is no danger of leaks or punctures, and the total weight of the appliance is about three pounds. The plates are not uncomfortable to wear, and they allow a free arm movement to the swimmer. Three of the plates are joined together with a web band having a shoulder strap which buckles about the body under the arms, with two plates on the back and one on the chest. Small wire loops make the joinings.

**Magicians of the Pen.**  
While W. W. Jacobs confesses that he often sits, pen in hand, a whole morning without putting a solitary word on paper, Sir Arthur Conan Doyle has written a story of 12,000 words without once leaving his desk. Even such a painstaking writer as the late L. L. Stevenson had his spasms of lightning work, in one of which he completed his famous "Jekyll and Hyde" story within seven days, and Hall Caine wrote the first and last lines of his "Life of Coleridge" in three weeks. While Sir J. M. Barrie emits four or five words a "good day" a week, H. G. Wells has often written 10,000 words between breakfast and bed, and Mrs. L. T. Meade has produced 20,000 words in a busy day.  
The late Andrew Lang, when in the mood, has more than once written 5,000 words of a book between breakfast and a late luncheon, and it is said that S. R. Crockett wrote the last half of "The Stick Minister" in forty hours.—London Answers.

Immediately after any workers are started on standard time and bonus their efficiency should be watched. If they do not soon become bonus earners and if their efficiencies do not continuously improve until they regularly average about 100 per cent the cause of this failure should be investigated, and if it be found that the standard is too short it should promptly be corrected.—H. L. Shepard in Industrial Management.

Six months in advance \$1.00  
Three months . . . . . \$ .50  
Advertising rates on application.  
Legal notices must be paid for in advance delivery of affidavit of publication. No exception to this rule.

**Editorial Comments**  
**Public Ownership Would Eliminate the Newspapers**

It is beginning to dawn upon the publishers of newspapers that as fast as anything can be turned over to public ownership it ceases to use the columns of the newspapers, a "just reward," maybe, for the latter's hard work and influence in boosting the Utopian dream of the visionary individual who prescribes collective ownership as a panacea for all our ills.

It has been the dream of the Oregon system promoters to publish a state newspaper in which all public business is advertised. A number of cities have experimented with municipal newspapers and print shops, and all have failed to make good on account of the many "leaks." Los Angeles and San Jose being among the number.

The State Insurance Commission publishes its own newspaper, a News Bulletin with 20,000 circulation. It solicits insurance from the employers and makes its own statements unchallenged and without discussion to its readers.

The municipal government of San Francisco has for several years published a free official newspaper, but no more. The expense to taxpayers for editors, printers, publication and postage has become so expensive that subscriptions had to be collected.

This will enable the city to secure postal privileges at the one-cent rate, and thus get into general circulation, besides having a free list.

**Advertising by the Inch Was Too High For Seth**

Seth was a tight-fisted old farmer. His brother William dying, the neighbors said, from lack of proper treatment, Seth hitched up and drove to town to have a notice about his death inserted in the weekly paper.

"There ain't no charges, be there?" he asked.  
"Oh, yes, indeed," answered the editor, "our price is two dollars an inch."  
"Crack!" muttered the old man, "An' Bill's six foot two."—Exchange.

**OFFERS GARDEN PRIZES.**

Brooklyn Park Chief Encourages Cultivation of House Lots.

Park Commissioner Raymond V. Ingersoll of Brooklyn has announced that his department will award this year prizes aggregating \$100 for the best vegetable gardens developed in private house lots in the borough. Concerning the promotion of gardening in Brooklyn the commissioner said: "In the spring of 1914 the first children's gardens were opened on park property in Brooklyn. These have been extended each year until this season. Individual plots will be cultivated and harvested by more than 1,800 children. So many inquiries were made at these gardens for advice about back yard cultivation that last spring the department opened four model back yard gardens. This spring a fifth model garden will be started on the Myrtle avenue plaza of Fort Greene park.

"As a result of last spring's efforts, though no prizes were offered, 700 actual back yard gardens were planted. This year Park Commissioner Ingersoll offers one prize of \$25, one of \$15, one of \$10 and ten of \$5 each in the hope that general interest will be further stimulated."

**Practical Value.**  
"Has your college education been of any practical value to you?"  
"You bet it has! If it wasn't for my experiences in track athletics I'd have to leave my house five minutes earlier every morning in order to catch the 7:38," replied the commuter.—St. Louis Republic.

**Took the Count.**  
"Bobby, you have been fighting with that Stapleton boy again. Did you count ten before you struck him, as I have always told you to do?"  
"No, but I was told that somebody counted ten after he landed on me."—Chicago Tribune.

**Try a Laugh.**  
The man who laughs "fit to kill" need have no fear of tuberculosis. A real, hearty, rib-tickling guffaw is better than a yawn for emptying the lowest passages of the lungs.  
To some the past gives only regret, the present sorrow, the future fear.—Lambert.

**The Battle Cry of "Feed 'em."**  
We'll rally round the hoe boys  
And join the ranks of toil,  
Shouting the battle-cry of "Feed 'em!"  
We'll train the crops to grow, boys,  
As tillers of the soil,  
Shouting the battle-cry of "Feed 'em!"  
Where there is work to do boys,  
We'll gather on the spot,  
Shouting the battle-cry of "Feed 'em!"  
To duty we'll be true boys,  
And till the vacant lot,  
Shouting the battle-cry of "Feed 'em!"  
Nature, kind mater, will aid in our need!  
Down with the tater and up with the weed!  
So we'll rally round the hoe boys,  
And train the crops to grow,  
Shouting the battle-cry of "Feed 'em!"  
—Edward Stanton  
Fullerton, Cal.

**LEGAL ADVERTISEMENTS**  
**SUMMONS.**

In the Superior Court of the County of Contra Costa, State of California.  
Greece May Nunnis, Plaintiff, vs. Albert Evert Nunnis, Defendant.

No. 7580. Action brought in the Superior Court of the County of Contra Costa, State of California, and the complaint filed in the office of the Clerk of said county of Contra Costa.

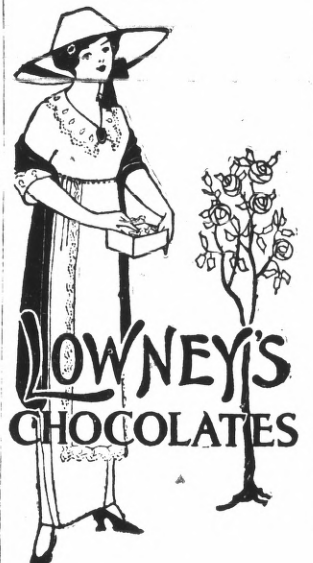

The People of the State of California send greeting to Albert Evert Nunnis, Defendant.

You are hereby directed to appear and answer the Complaint in an action entitled as above brought against you in the Superior Court of the county of Contra Costa, State of California, within ten days after the service on you of this summons, if served within this county, or within thirty days if served elsewhere. And you are hereby notified that unless you appear and answer as above required the said plaintiff will take judgment against you for any money or damages demanded in the complaint, as arising upon contract or will apply to the Court for any relief demanded in the complaint.

Given under my hand and the seal of the Superior Court of the County of Contra Costa, State of California, this 7th day of June, A.D. 1917.

J. H. WELLS, Clerk.  
S. Wells, Deputy Clerk.

**Why Straight-Distilled Gasoline**  
Because, in a straight-distilled gasoline the boiling points gradually rise in a continuous unbroken chain, giving easy starting, quick acceleration, power and mileage. Boiling points alone reveal gasoline quality. As the U. S. Bureau of Standards states, gravity tells you nothing. No mixture, however cleverly concocted and no matter what its gravity, can contain the correct, unbroken series of boiling points.  
Red Crown is guaranteed to be a straight-distilled refinery gasoline, the boiling points of which form a continuous chain. Red Crown is not a mixture.  
**STANDARD OIL COMPANY**  
"The Gasoline of Quality"

**RED CROWN GASOLINE**

**A Continuous Chain of Boiling Points**  
High Boiling Points for power & mileage  
Medium Boiling Points for quick & smooth acceleration  
Low Boiling Points for easy starting

Home-seekers are not only looking for property in  
**ALBANY**  
But they are building homes there by the score  
**WHY?**  
Because of that city's natural advantages, its close proximity to the big shopping districts of the Pacific Coast, Oakland and San Francisco.

**Albany's Splendid New Schools and Healthful Climate**  
Ten Minutes From the Great University of California  
Twenty minutes to the best theatres and the big markets for  
**ONE SMALL "JITNEY" ★ (Can you beat it?)**  
And then—

**Albany Will Get the Naval Base**  
And there you are. Why not live in a city with good drainage, a perfect sanitary system, excellent fire protection and street improvements, a city already made—not a pioneer place with its inconveniences and high car taxes. Best of all, Albany has a LOW TAX RATE. Secure a fine home or lot at a SANE PRICE NOW.

**COOK WITH PEARL OIL**

**ECONOMY**  
An oil cook-stove is cheaper to buy than a wood or coal stove and it's much cheaper to operate. Meals in a jiffy, and a cool kitchen in summer.  
All the convenience of gas—economical for all the year 'round cooking. Bakes, broils, roasts, toasts. Steady, evenly-distributed heat, the best for cooking.  
The long blue chimneys prevent all smoke and smell.  
In 1, 2, 3 and 4 burner sizes, with or without ovens. Also cabinet models. Ask your dealer today.
